

SOFTA-MAN®

CLEAN HANDS SAVE LIVES

An unusual name for a unique product. "Man" is short for manus, latin for hands; Softa-Man® literally means soft hands. As a clinician, your hands are your primary tool and it makes sense that you protect them, as well as your patients.

"The antimicrobial efficacy of alcohol based hand formulations is superior to that of all other currently available methods of preoperative surgical hand preparation." (WHO Guidelines on Hand Hygiene in Health Care, 2009, p. 56)*

Enriched with high quality skin protectors (dexpanthenol, allantoin and bisabolol) and moisturisers, Softa-Man® is suitable for frequent and long term use.

It contains hypoallergenic perfumes, is free of colourants and is conveniently available in a liquid and gel solution.

BENEFITS

- Unique two alcohol solution is effective against a broad spectrum of microbes.
"Importantly, when testing the same concentration, the results clearly demonstrated that the efficacy range was: N-propanol is the most active, followed by ethanol, then isopropanol." (WHO Guidelines on Hand Hygiene in Health Care, 2009, p. 46)*
- Protects sensitive skin - incorporates emollients designed to make the epidermal layers of the skin softer and more pliable.
- Inline with the WHO Global Patient Safety campaign.
- Can be used anywhere in the clinical environment, from Reception through to Surgery.

APPLICATION / EXPOSURE TIMES

- Hygienic hand disinfection = 30 seconds
- Surgical hand disinfection = 90 seconds

Conforms to
Hygienic Hand
Disinfection
EN1500, Surgical
Hand Disinfection
EN12791.
