

Learn Anaesthesia & Pain Management with

DR MARGIE MCEWEN

With years of teaching anaesthesia & pain management in both the US and Australia, Dr Margie McEwen brings to the VetPrac community something for everyone. "Learn with Margie" Zoom Rounds are an opportunity for you to bring along your questions to drive the discussion.

Margie will start the session with some material focused on the topic and then you and your fellow participants will have the opportunity to take the driver's seat. Perhaps you have a specific case that you want to ask about? Or you have a question about a patient's anaesthetic protocol where you need to consider a medical process that is occurring too? Participant experience, combined with their own cases will fuel this discussion, as Margie facilitates and shares her experience and knowledge to help answer your questions. As a collective we will learn a lot together in a short period of time.

These clinical Zoom Rounds sessions have limited places and you will need to register through the link below to secure a place.

Be fast, the places are filling quickly.
